

Proper PDF Format

1. Actuarial Post requires electronic files to be in PDF format. If documents are currently in PostScript files, convert to PDF format using Acrobat Distiller 4.0 (or greater) with all fonts embedded (text & image PDF). Flash (SWF) files are also accepted. We cannot accept SWF files created in SWiSH, only Flash. Any SWF files should be accompanied by the FLA file from which they were created.
2. The preferred output resolution of the PDFs is 150 dpi, print ready quality.
3. Supply the PDF compiled as single pages, if not compiled, page numbers must be indicated on file name.
4. Pages should be cropped to trim. If they cannot be cropped, need crop marks to be at the same location on each page.
5. All pages need to be the same width and height (except for special pages such as gatefolds, belly bands, etc).
6. Any gatefolds, cover wraps, bind-ins or bellybands clearly indicated.
7. Convert any ligatures into their proper letters before sending files.
8. PDF files must not use overprint.
9. Please note that we cannot use PDF/X standard files.
10. When embedding links within the PDF using the Link Tool in Acrobat - make sure the Link Type is set to "Invisible Rectangle" and the Highlight style is set to "None".
